

In first grade...

- Students grow from beginning readers into confident readers and writers.
- Math skills expand as they learn place value, double-digit addition, and how to tell time.
- Students complete a Saints report and give an oral presentation to build research and speaking skills.
- Students also participate in the school musical *Character Matters*.
- Through the Religion Buddies program, first graders are paired with sixth-grade students for faith-based activities and mentorship.
- Field trips help reinforce learning and bring nonfiction topics to life.

It is a year of meaningful growth both developmentally and academically.
